1 CAPABILITY COMMITMENT STATEMENT

This serves to certify that all items listed in this Aircraft Maintenance Organization Capability List CH.145.0209 are within the approved scope of [the](#) maintenance organization certificate and [operation specification](#) as approved by the [Compliance Monitoring](#) Manager. Pilatus Aircraft Ltd. has the appropriate premises, facility, tools, equipment, material, airworthiness documentation and personnel to perform the work on the aircraft or aircraft components as listed in the capability [list and](#) meets the requirements of EASA PART-145.

2 CAPABILITY CONTROL

2.1 Amendments

Amendments or Updates are changes to the PILMO Capability List that do not require a full revision of such as adding/removing part numbers or correcting minor spelling mistakes, etc.

New components may only be added to the PILMO Capability List if the component is within the current repair station ratings, if maintenance data are available that has been approved by the owner of the design organization (in most cases the TC holder) and the evaluation according MOE Cp. 1.11 & PIL-MOP-03-06 has been successfully carried out.

All amendments in the PILMO Capability List are documented on the last page "Record of Amendments" and do not require the prior approval of the Competent Authority for inclusion, provided that the above requirements are met and the Competent Authority receives a copy of the "Record of Amendments".

An amended PILMO Capability List is uploaded to the Pilatus Intranet and is available to all maintenance staff.

2.2 Revisions

This PILMO Capability List shall be revised as necessary (but at least every six months) to ensure that its content is correct, exhaustive and adapted to the requirements of the approved Pilatus MOE and its Supplements.

Revisions to the PILMO Capability List shall be:

- a) Approved by the [Compliance Monitoring](#) Manager (AQ) or his Deputy who shall sign and date the List of Effective Pages at the front of the PILMO Capability List.
- b) Submitted to the Competent Authority (e.g. via E-Mail).
The Competent Authority will then sign, date and stamp the List of Effective Pages at the front of the PILMO Capability List if the revision is accepted.

If the Competent Authority does not accept any of the amendments, the necessary actions shall be taken to correct the unacceptable amendments to obtain the agreement of the Competent Authority.

At each revision, the parts listed in "Record of Amendments", will be emptied as a new revision starts with new amendments. The changes in the new revision are indicated by a blue line (|) at the left edge next to the changed text.

The revision shall include a new List of Effective Pages signed by [the Compliance Monitoring](#) Manager (AQ) or his Deputy.

A revised PILMO Capability List is uploaded to the Pilatus Intranet and is available to all maintenance staff.

Maintenance staff are notified by e-mail when a new revision of the PILMO Capability List has been uploaded to the Intranet.
