

ATTENTION INDS APEX CUSTOMERS:

DATE: November 15, 2012
SUBJECT: JSUM Enhancements
DATABASES: NavData and Terrain
Effective: November 26, 2012

Dear Valued Customer,

In addition to the blue INDS charts data download already available, we will begin delivering Apex NavData and Terrain data through the Jeppesen Services Update Manager (JSUM) effective Monday, November 26, 2012. This will allow you to receive all three INDS databases in a second convenient location (they will remain available at www.epicinds.com).

If you do not have a JSUM username and want to try it out, you can contact us at inds@jeppesen.com to have one created.

To learn more about JSUM, or download JSUM, click [here](#), or type this address into your internet browser:

<http://www.jeppesen.com/jsum/download>

*To see which operating systems JSUM is currently compatible with, please visit the FAQ section.

We hope this enhancement will make your Apex update experience better.

Thank you for your continued business!

Sincerely,

Account Services
