

PILATUS AIRCRAFT LTD. CH-6371 STANS, SWITZERLAND

SERVICE LETTER

SUBJECT: YEAR 2000 COMPLIANCE (Y2K) OF ELECTRONIC EQUIPMENT

All Operators

Date: Aug 31/98

Scope

The Year 2000 compliance (Y2K) issue of equipment using software is a high priority matter within PILATUS Aircraft Ltd. We are committed, in co-operation with our suppliers, to identifying and minimizing the impact of the Y2K issue on all PILATUS aircraft, as well as all related supporting systems.

PILATUS has formed a Y2K Project Team comprising representatives from across all the business units within PILATUS Aircraft Ltd. The terms of reference for the project team are to manage and act as necessary to both, understand the magnitude of any potential problem, and identify the steps to mitigate it. This includes current projects as well as all aircraft and related systems produced and/or delivered by PILATUS within the last twenty years. The project team is also considering engineering, business administration and infrastructure related problems.

PILATUS is currently evaluating all equipment which could be affected by the expected Y2K problems. The evaluation done so far has not brought any non-compliance to our attention.

Should any new information be found PILATUS will issue a revision to this Service Letter.

Modifications carried out by the customer not based on a Service Bulletin issued by PILATUS Aircraft Ltd. are NOT considered.
