

PILATUS AIRCRAFT LTD. CH-6371 STANS, SWITZERLAND

SERVICE LETTER

SUBJECT: PASSENGER DOOR

To all Customers and Operators:

Date: Feb 22/05

This Service Letter is issued to draw attention to the following information:

Passenger Door - Internal Corrosion

Operators of PC-12 and PC-12/45 aircraft should be aware of the possibility of corrosion occurring in the passenger door interior. The corrosion is caused when salt laden water enters the interior of the door during passenger loading in certain environmental conditions. Severe damage to the door could occur if such corrosion is neglected.

Changes to the inspection criteria (Ref: Aircraft Maintenance Manual, 05-10-20) will be implemented to reduce the risk of corrosion damage.

Operators requiring further information on this subject, please contact one of the addresses given below:
